DLP-01

September 2011

TITLE: DMD Chip Release

PURPOSE: Reduce repair costs for out of warranty optical engine

MODELS: V36 to V41+ chassis

276P595010 - DMD-CHIP:IC-1910-6143W

The DMD IC is now available for purchase from the parts department. Part number 276P595010 is the DarkChip4™ version of the Digital Micromirror Device used in our DLP TVs. The availability of this IC will help reduce the cost of field repairs to the end user and reduce the demand for Optical Engines.

DMD-Chip is not available for warranty replacement
on ANY MODEL without special authorization.
