NOTES:

1. P1: Head Solenoid, P2: Brake Solenoid
2. Only while the input key is pressed, the REC indicator is on. When the key is released, the mode will return to "STOP".
3. In case of the change-over to the mode with "*", P1 and P2 work 0.5 to 1.0 sec. after the key is pressed. On the other hand, in case of

the change-over to the mode without "*", P1 and P2 works simultaneously. In both cases, the indicator is driven simultaneously.

4. "PLY" key should be pressed with "REC" key kept pressed.
